## Work completed during the week of June 18 through 24:

Debco Construction continued excavation and embankment work. The cattle guard and culvert pipe for the approach road to the Grasshopper Creek campground were installed. Crushing continued at the Kipp pit and Debco hauled waste material to the Harrison pit. Erosion control devices were maintained and installed as needed.

## Activities scheduled for the week of June 25 through July 1:

Rock crushing, embankment, excavation, and culvert installation will continue. Debco will continue to haul waste material to the Harrison pit. Surveying will continue as Debco begins to finish the subgrade. Work at the bridge is also scheduled to begin this week.

Campgrounds: Price Creek and Grasshopper campgrounds are open.

Traffic Control: Flaggers and a pilot car guide traffic through the project as needed. Beginning on June 26, a pilot car will be used to guide traffic through the detour route (Elkhorn Hot Springs to Price Creek) during work hours and the 30 feet (combined vehicle length) restriction will be in place. Vehicles with a combined length over 30 feet will be piloted through the Byway from 9:00 am to 10:00 am and from 2:00 pm to 3:00 pm. During non-work hours the Byway will be open to public travel and there will not be any length restrictions. **On Weekends and Holidays the Byway is open to public travel.**

If you have any questions or comments regarding the status of the project, please call me at (406) 834-3618.

Respectfully,  
Daniel L. Christianson, Project Engineer
